

Roberts 45 additive is a modified synthetic latex compound for adding to Roberts cement underlay powders to improve tensile strength and adhesion.

Mixing

When used as an admix dilute 1 part 45 Additive to 4 - 4.5 parts of clean water.

Application

Roberts 45 is used diluted with clean water in varying ratios depending on use. An amount of 45 is added to replace part of the gauging water when mixing underlayment powder to improve tensile strength for heavy traffic applications.

Clean Up

Clean all equipment with water immediately after use

Packaging

5 litre containers.

Storage

Store in cool dry area out of direct sun light and protect from frost

Shelf Life

12 months in unopened container.

Safety & Handling

Material Safety Data Sheet available upon request.
