

# Patch & Repair Patching Compound

## GENERAL DESCRIPTION

A vinyl polymer modified cement based powder, which when mixed with water, rapidly hardens to a rock-like finish. Patch & Repair has very strong adhesion to most porous substrates, and does not chip, or powder off.

## USES:

Patch & Repair is recommended as a patching and filling compound for repairing holes or cracks in the subfloor, prior to installing floor coverings. It may be feathered out to take up slight irregularities.

**Note:** Patch & Repair is not intended for use as a subfloor underlayment, and should not be used where it may be exposed to moisture.

## PREPARATION:

Concrete or timber must be dry, and free of dirt, dust, grease, oil, paint etc.

## APPLICATION:

Mix Patch & Repair with water, to a putty-like consistency, and apply with a knife, trowel, or spatula.

As Patch & Repair sets hard in 15 minutes; do not mix in greater quantities than can be used in about 10 minutes.

Floorcoverings can be laid over Patch & Repair as soon as it has hardened.

## TECHNICAL DATA

**Type:** Filing Compound

**Composition:** Polymer modified  
Cement based

**Colour:** White

**Flash Point:** Non-flammable

**Setting Time:** Approx 15 minutes @ 20°C

**Coverage:** 1kg will mix up to about 500ml

**Pack Size:** 10kg, 20kg
