

• Vacuum Sander • Cut Back Machine  
• Polisher • Buffer

# SS405

Built in Australia to withstand the toughest of commercial conditions, the SS405 is a universal rotary floor machine suitable for vacuum sanding, cutting back floor finishes between coats, suction scrubbing/polishing, buffing and applying waxes and oils.

With a centrally mounted motor coupled to a helical drive gear box, this virtually maintenance free machine, is smooth and well balanced without suffering torque loss due to slipping belts.
